

## IT Security

Comprehensive protection for your business critical information and IT assets

### Introduction

The value of information – particularly your organisation’s financial information – is now so great that operating any kind of IT infrastructure requires a robust and multi-layered IT security solution. Comtec can address your IT security challenges, with the knowledge and understanding that threats do not only come from external sources but can emerge from internal sources as well.

Comtec works closely with leading IT security vendors such as Cisco, SonicWALL and Barracuda to safeguard the integrity of your data and your entire IT infrastructure. Comtec’s expertise ensures that the productivity of your staff is not compromised by network downtime, inappropriate web usage, or the distraction of spam. We pride ourselves on delivering IT security solutions that ensure organisations are not constrained by their business operations.

### Features

An IT security solution from Comtec will be drawn from the following features:

- » Best-of-breed technology in each of the key IT security disciplines:
  - Firewall (including for web 2.0 traffic, such as IM).
  - Anti-Spam.
  - Anti-Virus.
  - SSL VPN.
  - Content Filtering.
  - Web Security (including for web applications).
  - Real-time data backup and recovery.
  - Secure Email Archiving.
  - Unified Threat Management.
- » Vulnerability and penetration assessment.
- » Flexible support options and 24 x 7 x 365 network operations centre (NOC).

---

## Advantages

Comtec's approach, skill-set and experience greatly benefit clients who seek to harness the power of an IT security implementation. The advantages of a Comtec IT security solution include:

- » Experienced, accredited engineers and consultants.
- » Access to the most stable and technically superior technology.
- » An advanced understanding of IT security threats, both external and internal.
- » A knowledgeable approach to integrating technology enforcement to meet your chosen IT usage, compliance and security policies.
- » A commitment to implementing comprehensive IT security solutions that do not significantly detriment overall system performance.
- » Cost-effective pricing with flexible payment options.
- » Ongoing reliable support.

---

## Benefits

Work with Comtec on your IT security implementation, and you can achieve the following business objectives:

- » Ensure business uptime against a multitude of evolving threats.
- » Mitigate the business impact of inappropriate web/email usage within your organisation.
- » Keep pace with the underlying security requirements of regulatory compliance.
- » Enforce optimum IT security without degrading IT system and network performance.
- » Ensure secure remote access to centrally held IT resources.

---

Comtec works closely with leading IT security vendors such as SonicWALL, Barracuda, Cisco and Symantec. Its experienced and highly qualified people can advise on any aspect of your IT security requirements in a totally independent fashion.
